Reason for Allowance

1. Claims 1, 3-12, 14-18 and 20-30 are allowed.
2. The following is an examiner's statement of reasons for allowance:

The claimed invention is directed toward a method implemented by a computing device for real-time dynamic switching between a first service provider providing a first Web-service for users via a program executing at a user's computer device over a communications network in accordance with a service level agreement between a user and said first service provider and a second service provider adapted for providing a second Web-based service for users at a user's computer device, said method comprising the steps of: automatically monitoring said first Web-based service for determining compliance of service-level guarantees according to said service level agreement by said first service provider at said user's computer device, said monitoring including accessing internal functioning of said first Web-based service that is currently in use; and, upon determining non-compliance of said service-level guarantees, locating said second service provider for providing said second Web service according to service-level guarantees compatible with needs of said executing program; maintaining state information that the program has created in the first Web service provided by said first service provider at said user's computer device; terminating said service level agreement between said user and said first service provider; and switching provision of said second Web service to said user's computer device from said second service provider over said communications network; and, migrating said state information maintained up to the time of switching to said second Web service provided by said

second service provider, said state information including state information maintained by said first web service provider on behalf of the user, wherein the switching occurs in a manner substantially transparent to the user, wherein a switching criterion for initiating said switching includes one or more selected from the group comprising: the relative prevalence of advertisements or SPAM, the relative usability of a user interface provided at computer device, the relative cost of the service provided by said second service provider as compared to a cost of the service provided by first service provider, a relative cognitive load of a user, and, a relative security of said service provided by said second service as compared to the service provided by first service provider.

In specific, the prior art of record taking singly or in combination does not teach or suggest a combination of method of migrating said state information maintained up to the time of switching to said second Web service provided by said second service provider, said state information including state information maintained by said first web service provider on behalf of the user. In addition, Applicant's argument presented in page 14, paragraph 1 of the remark dated 12/01/2008 with respect to the rejection of claims 1 and 18 has been fully considered and deemed persuasive. Wherein the remark, the Applicant argues that Ishiyama appears to teach that only the state information present on the user's computer device is maintained in Ishiyama and not maintained by said first web service provider on behalf of a user. Thus, in Ishiyama, no state information present at the switched-from ISP is transferred to the switched-to ISP and such information is not maintained. Therefore, the closest prior art of record (i.e. Ishiyama et al. (Publication no.: US 2005/0102415 A1), Zhu et al. (PGPUB. No." US

2003/0167339 A1) and Patel et al. (Patent no.: US 7,149,778 B1).) taking singly or in combination does not teach or suggest this feature. Based on this reasoning, claim 1 is allowable over the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
